

Project Fact Sheet
Signage & Wayfinding for Parks, Trails, and Unique Places
PN 4-C-035-24
April 16, 2024

Project Manager: Tod Hueser / John Brockus

Description: The project will allow the City to properly plan for, design and incorporate an improved signage and wayfinding system in parks, on trails, and within unique places. Deliverables will include a Signages & Wayfinding Design guidelines manual and conceptual planning for a pilot project.

Justification: This project is needed to address a lack of quality, consistent signage and wayfinding tools in the City of Olathe's parks, trails, and open spaces. This project has been identified as a priority project in the Parks & Recreation Master Plan. Investing in a wayfinding system is essential for ensuring residents and visitors develop a positive perception of the City of Olathe.

Schedule:	Item	Date
Design:	RFQ	11/01/2023
	Consultant Selection	04/16/2024
Plan Completion:		Fall 2024 – estimate
Council Actions:	Date	Amount
Project Authorization	04/16/2024	\$100,000
PSA with Tangram Design	04/16/2024	\$ 74,197
