Data Used in this Analysis, if included , follows the Costs and Benefits for the State of Kansas

## About this Cost-Benefit Analysis Report

---

This cost-benefit analysis report was prepared using the Kansas Tax Abatement Cost-Benefit Model - a computer program that analyzes economic and fiscal impact. The pages that follow, in this report, show the impact that the firm included in this analysis, the firm's employees and workers in spin-off jobs will have on the community and the state.

The economic impact over the next ten years is calculated along with the accompanying public costs and benefits for the State of Kansas and the taxing entities included in this analysis.

This analysis also shows the effect of tax abatements and incentives that may be considered for the firm

Here is how the analysis was performed:

1. Data was entered for the state and community's tax and other rates; the firm and its employees; tax abatements and other incentives being considered for the firm; construction activity; and expected visitors.

2. Using the data entered, as well as some rates built into the computer program, calculations were made of the economic impact of the firm along with the related costs and benefits.

The calculations of impact include direct, indirect and induced impact. Regional economic multipliers, specific to the firm's industry group, were used by the program to calculate the direct and induced or spin-

These are the report sections:

**Summary of Costs and Benefits for all Taxing Entities** This report page summarizes the costs and benefits for all taxing entities resulting from the firm and from new direct, indirect and induced jobs.

**The Economic Impact that the Firm will have on the Community** This report page shows the number of direct, indirect and induced jobs that will be created in the community, the number of new residents and additional school children, and increases in local personal income, retail sales, economic activity and the property tax base in the first year and over the next ten years.

**Costs and Benefits for Each Taxing Entity** These report pages summarize the costs and benefits for the State of Kansas and for each taxing entity as a result of the firm locating or expanding in the Kansas community.

The public benefits include additional revenues from the firm and employees for your taxing entities - - - sales taxes, property taxes, utilities, utility franchise fees, other payments by new residents, payments by the firm and additional school funding. Public costs include the additional costs of public services for new residents and the firm, costs of educating new students that move to the school district, along with tax abatements and incentives provided to the firm.

In addition to a presentation of public costs and benefits, this report also computes the present value of net benefits to be received by each taxing entity; the payback period for incentives and taxes to be abated; the rate of return on investment for each entity and cost-benefit ratios.

### Present Value

The present value of the expected cash flow over the next ten years - the excess of benefits over cost - for each entity was computed. Present value is a way of expressing in today's dollars, dollars to be paid or received in the future. Today's dollar and a dollar to be received or paid at differing times in the future are not comparable because of the time value of money. The time value of money is the interest rate or each taxing entity's discount rate. The analysis uses a discount rate that is entered to make the dollars comparable--by expressing them in today's dollars or in present value.

Generally, a positive present value indicates an acceptable investment.

### Payback Period

The investment payback period for each taxing entity was computed. This analysis views the financial incentives, including tax abatement, that the taxing entities are considering for the firm as an investment that the public will be making in the company. The payback period, therefore, is the number of years that it will take each taxing entity to recover the cost of incentives from the net annual benefits that they will receive. This payback period also shows the point in time where the cost and benefits are equal for the level and length of tax abatements and incentives being granted.

The payback period is a basis for judging the appropriateness of providing incentives to a firm. Generally, the shorter the payback period the better the investment.

### Rate of Return on Investment

The rate of return on investment for each taxing entity was also computed. As with the computation of payback, the rate of return analysis views the incentives that each taxing entity is considering as an investment that the public will be making in the company. The rate of return, therefore, is annual rate of return, over the next ten years, on each taxing entity's investment in the firm.

Generally, a rate of return in excess of the taxing entity's cost of capital is considered desirable.

### Cost-Benefit Ratio

The cost-benefit ratio for each taxing entity was also computed. This ratio compares public benefits over a ten year period from the new or expanding firm to public costs during the same period. For example, a cost-benefit ratio of 1.55 (or 1.55 to 1) shows that ten year benefits are 155 percent of public costs. Conversely, a cost-benefit ratio of .75 shows that public benefits are only 75 percent of public costs -- costs exceed benefits.

Generally, a cost-benefit ratio of 1.30 to 1 is considered acceptable for a taxing entity to grant tax abatements and other financial incentives to a firm.

**Data Used in this Analysis** These report pages, if included, show the data used in this cost-benefit analysis.

**Summary of Costs and Benefits for all Taxing Units**

**Benefits:**

	Sales Taxes	Property Taxes	Utilities and Utility Franchise Fees	Corporate and Personal Income Taxes	Additional School Funding	Other Revenues	Total Benefits

## Local rates and constants used in the Analysis of 175 Commerce Center Land LLC

### City:

Olathe	City name
23.334	City mill levy
\$488,000	Average market value of new residential property in the city
1.500%	City sales tax rate
6.000%	City transient guest tax rate
\$103	Annual net revenues per household for city owned utilities
\$303	Average annual utility franchise fees collected per household
\$103	Annual revenues per resident, in addition to property, transient guest and sales taxes, utilities and utility franchise fees
\$133	The city's annual marginal cost of providing municipal services, excluding utilities, to each new resident
\$50	Annual per worker revenues for the city from businesses -- in addition to property, transient guest and sales taxes and utilities
\$121	Annual marginal cost, per worker, of providing city services, excluding utilities, to businesses

### County:

Johnson	Name of county
20.3130	County mill levy
\$583,000	Average market value of new residential property in the county
1.475%	County sales tax rate
0.000%	County transient guest tax rate
\$496	The county's annual revenues per resident, excluding property; transient guest and sales taxes
\$171	The county's annual marginal cost of providing municipal services to each new resident
1.00	Regional economic multiplier adjustment for the County
\$218	Annual per worker revenues for the county from businesses -- in addition to property, transient guest and sales taxes and utilities
\$121	The county's annual marginal cost, per worker, of providing services to businesses

### School District 1 -- Where the firm is or will be located

Gardner Edgerton Schools	Name of school district
51.759	School district 1's local option mill levy
\$368,000	Average market value of new residential property in school district 1
\$9,066	School district 1's estimated marginal cost per child
\$7,044	State funding per child in school district 1
\$2,022.00	Federal and other annual funding per child in school district 1

### School District 2 -- A neighboring school district where some of the firms's new employees will live

Olathe Schools	Name of school district
----------------	-------------------------

53.948	School district 2's local option mill levy
\$430,000	Average market value of new residential property in school district 2
\$11,929	School district 2's estimated marginal cost per child
\$11,287	State funding per child in school district 2
\$640.00	Federal and other annual funding per child in school district 2

## Special Taxing District 1 -- Where the firm is or will be located:

Johnson County Community College	Special tax district 1
7.873	Special tax district 1's mill levy
\$540,000	Average market value of new residential property in special tax district 1
\$0.00	Special tax district 1's cost per resident
\$0.00	Special tax district 1's annual addl. revenues (excl prop taxes) from each new resident
\$78	The district's annual marginal cost, per worker, of providing services to businesses
\$171	Annual per worker revenues for the district from businesses -- in addition to property sales taxes and utilities

## Special Taxing District 2 -- Where the firm is or will be located:

School Mills 8	Special tax district 2
8	Special tax district 2's mill levy
\$421,875	Average market value of new residential property in special tax district 2
\$0.00	Special tax district 2's cost per resident
\$0.00	Special tax district 2's annual addl. revenues (excl prop taxes) from each new resident
\$0	The district's annual marginal cost, per worker, of providing services to businesses
\$0	Annual per worker revenues for the district from businesses -- in addition to property sales taxes and utilities

## State of Kansas:

1.5	State mill levy
0.065	State sales tax rate
\$508.00	State's annual marginal revenues per new resident (excl property, income and sales taxes)
\$468.00	State's annual marginal cost of providing services to each new resident
0.115	State tax classification for residential real property
0.25	State tax classification for commercial and industrial real property
0	State tax classification for commercial and industrial machinery and equipment (7 years or more life)
0.3	State tax classification for all other tangible personal property:
7	Economic life, in years for straight line depreciation of commercial and industrial machinery & equipment
0	Minimum taxable value as a percent of retail cost of commercial and industrial machinery & equipment
\$180	The state's annual marginal cost, per worker, of providing services to businesses
\$212	Annual per worker revenues for the state from businesses, excluding property, income and sales taxes
45.00%	Percent of gross salary that a typical Kansas worker spends on taxable goods and services

### Personal Income Taxes:

Income >	Over	But Not Over	=	Tax	+	Tax Rate
	\$0	\$30,000		\$0		3.50%
