

A Tax Abatement Cost-Benefit Analysis of Scannell Properties #798, LLC

City or County where the firm is or will be located: **City of Olathe**

Date of Analysis: Friday, May 08, 2026

Description of the firm's location or expansion in the community:

Building 5

This report includes an analysis of costs and benefits from the firm for the following taxing entities, where the firm is or will be located. These taxing entities, with the exception of a neighboring school district, if shown, are considering tax abatements or incentives for the firm:

City:	Olathe
County:	Johnson
School District:	Gardner Edgerton Schools
A neighboring School District:	Olathe Schools
Special Taxing District:	Johnson County Community Colleg
Special Taxing District:	School Mills 8
State of Kansas

Data Used in this Analysis, if included , follows the Costs and Benefits for the State of Kansas

About this Cost-Benefit Analysis Report

This cost-benefit analysis report was prepared using the Kansas Tax Abatement Cost-Benefit Model - a computer program that analyzes economic and fiscal impact. The pages that follow, in this report, show the impact that the firm included in this analysis, the firm's employees and workers in spin-off jobs will have on the community and the state.

The economic impact over the next ten years is calculated along with the accompanying public costs and benefits for the State of Kansas and the taxing entities included in this analysis.

This analysis also shows the effect of tax abatements and incentives that may be considered for the firm.

Here is how the analysis was performed:

1. Data was entered for the state and community's tax and other rates; the firm and its employees; tax abatements and other incentives being considered for the firm; construction activity; and expected visitors.
2. Using the data entered, as well as some rates built into the computer program, calculations were made of the economic impact of the firm along with the related costs and benefits.

The calculations of impact include direct, indirect and induced impact. Regional economic multipliers, specific to the firm's industry group, were used by the program to calculate the direct and induced or spin-off jobs and earnings in the community.

These are the report sections:

Summary of Costs and Benefits for all Taxing Entities This report page summarizes the costs and benefits for all taxing entities resulting from the firm and from new direct, indirect and induced jobs.

The Economic Impact that the Firm will have on the Community This report page shows the number of direct, indirect and induced jobs that will be created in the community, the number of new residents and additional school children, and increases in local personal income, retail sales, economic activity and the property tax base in the first year and over the next ten years.

Costs and Benefits for Each Taxing Entity These report pages summarize the costs and benefits for the State of Kansas and for each taxing entity as a result of the firm locating or expanding in the Kansas community.

The public benefits include additional revenues from the firm and employees for your taxing entities - - - sales taxes, property taxes, utilities, utility franchise fees, other payments by new residents, payments by the firm and additional school funding. Public costs include the additional costs of public services for new residents and the firm, costs of educating new students that move to the school district, along with tax abatements and incentives provided to the firm.

In addition to a presentation of public costs and benefits, this report also computes the present value of net benefits to be received by each taxing entity; the payback period for incentives and taxes to be abated; the rate of return on investment for each entity and cost-benefit ratios.

Present Value

The present value of the expected cash flow over the next ten years - the excess of benefits over cost - for each entity was computed. Present value is a way of expressing in today's dollars, dollars to be paid or received in the future. Today's dollar and a dollar to be received or paid at differing times in the future are not comparable because of the time value of money. The time value of money is the interest rate or each taxing entity's discount rate. The analysis uses a discount rate that is entered to make the dollars comparable--by expressing them in today's dollars or in present value.

Generally, a positive present value indicates an acceptable investment.

Payback Period

The investment payback period for each taxing entity was computed. This analysis views the financial incentives, including tax abatement, that the taxing entities are considering for the firm as an investment that the public will be making in the company. The payback period, therefore, is the number of years that it will take each taxing entity to recover the cost of incentives from the net annual benefits that they will receive. This payback period also shows the point in time where the cost and benefits are equal for the level and length of tax abatements and incentives being granted.

The payback period is a basis for judging the appropriateness of providing incentives to a firm. Generally, the shorter the payback period the better the investment.

Rate of Return on Investment

The rate of return on investment for each taxing entity was also computed. As with the computation of payback, the rate of return analysis views the incentives that each taxing entity is considering as an investment that the public will be making in the company. The rate of return, therefore, is annual rate of return, over the next ten years, on each taxing entity's investment in the firm.

Generally, a rate of return in excess of the taxing entity's cost of capital is considered desirable.

Cost-Benefit Ratio

The cost-benefit ratio for each taxing entity was also computed. This ratio compares public benefits over a ten year period from the new or expanding firm to public costs during the same period. For example, a cost-benefit ratio of 1.55 (or 1.55 to 1) shows that ten year benefits are 155 percent of public costs. Conversely, a cost-benefit ratio of .75 shows that public benefits are only 75 percent of public costs -- costs exceed benefits.

Generally, a cost-benefit ratio of 1.30 to 1 is considered acceptable for a taxing entity to grant tax abatements and other financial incentives to a firm.

Data Used in this Analysis These report pages, if included, show the data used in this cost-benefit analysis.

Summary of Costs and Benefits for all Taxing Units

Benefits:

	Sales Taxes	Property Taxes	Utilities and Utility Franchise Fees	Corporate and Personal Income Taxes	Additional School Funding	Other Revenues	Total Benefits
