

Project Fact Sheet
K-10 at Lone Elm 24-Inch Watermain Relocation
PN 5-C-014-26
May 5, 2026

Project Manager: Nate Baldwin / Sabrina Parker

Description: This project will relocate an Olathe owned 24-inch transmission watermain that has been as conflicting with the proposed K-10/Lone Elm interchange project being administered and constructed by the Kansas Department of Transportation (KDOT).

Justification: As the utility owner, the City of Olathe is required to relocate the watermain.

Comments: Because the existing watermain is located within an easement that predates and supersedes the K-10 right-of-way, KDOT is responsible for reimbursing the City for the design and construction costs associated with the relocation.

Schedule:	Item	Date
Design:	Consultant Selection	05/05/2026
