

Jessica Schuller

Hi Jessica,

I just have a quick comment about the rezoning of the Battlecreek Estates, and it has probably already been mentioned by others. My concern has to do with the fence on the property that will enclose the creek and natural habitat to the existing wildlife in the area. I feel the fence should NOT enclose the creek but rather be on the development side of the creek (north side) so that it does NOT restrict wildlife access to this natural resource. Additionally, by fencing in this area, I feel it will force an increase in wildlife, deer in particular, onto 119th/Northgate which could cause more harm to travelers to the area. The deer and other wildlife happily follow the creek to the Millcreek trails. Putting up a fence that barricades the creek impedes their ability to move about safely. I and many others truly value and enjoy the wildlife in this area and wish to maintain their presence and their safety.

Thank you.
Chris Cantrell
